

ERP Solution for Trading & Manufacturing Groups

“One platform to manage your entire business!”

Agenda

ERP Overview

- One platform, key modules, and system benefits

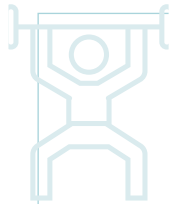

Modules & Features

- Sales, Inventory, Accounts, Procurement, Manufacturing

Reporting & Insights

- Dashboards, real-time reports, case study

System Strengths

- Reliability, backup, security, multi-business control

Why Choose Our ERP

- ROI, proven success, cost-effectiveness

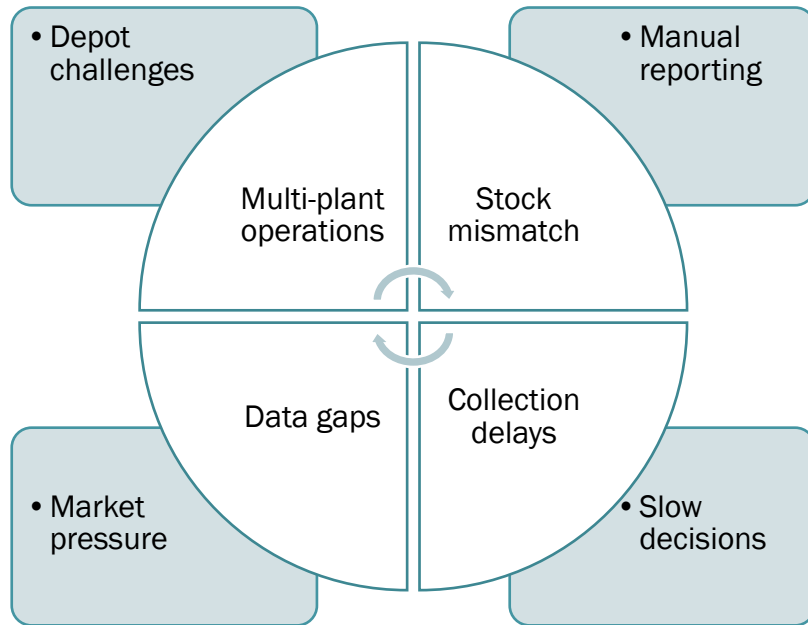

Closing / Q&A

- Call to action, next steps

Introduction

Understanding Your Business Challenges

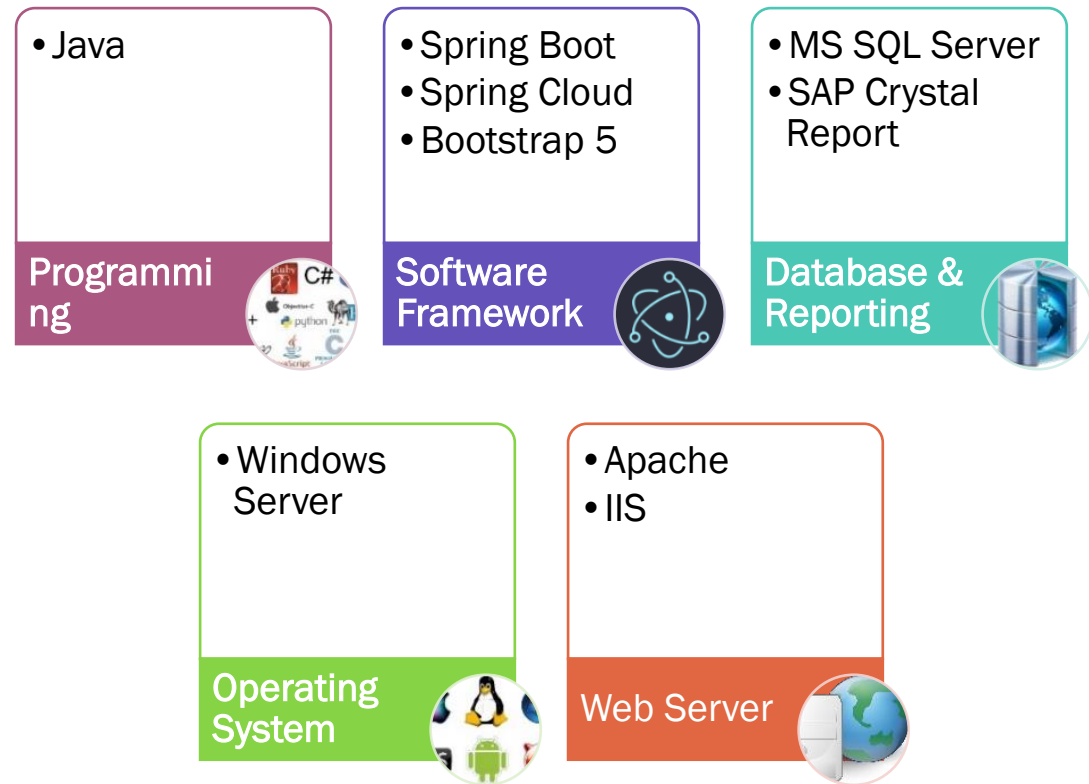

- ❑ Multi-branch manufacturing and sales create complexity
- ❑ Difficulty tracking purchase, sales, inventory, profit-loss in real-time
- ❑ Manual reporting slows decision-making and increases errors
- ❑ ERP can unify all operations under one platform

ERP Overview

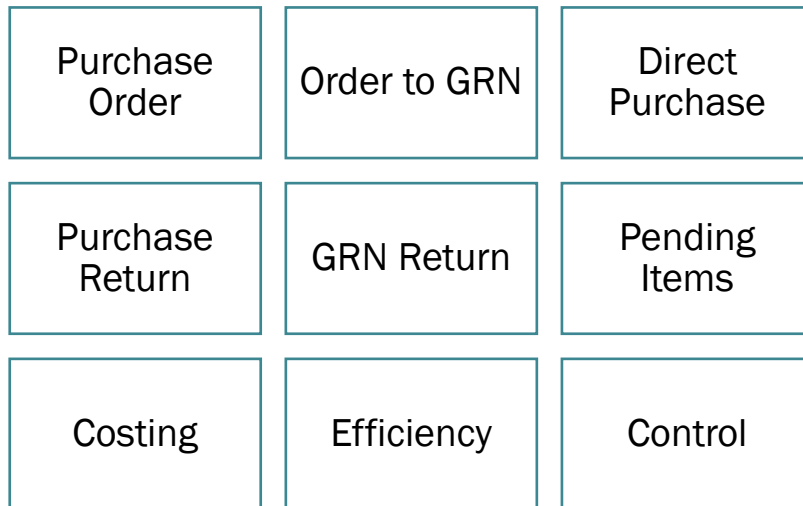

Our ERP Solution

- ❑ **One platform** to manage Sales, Inventory, Accounts, Procurement, and Manufacturing
- ❑ **Real-time** visibility across branches and depots
- ❑ Multi-company, multi-department support & **150+ reports**
- ❑ **Device-responsive**: access from PC, tablet, or mobile
- ❑ Proven for manufacturing groups for **3+ years**

Core Modules

Purchase & Procurement

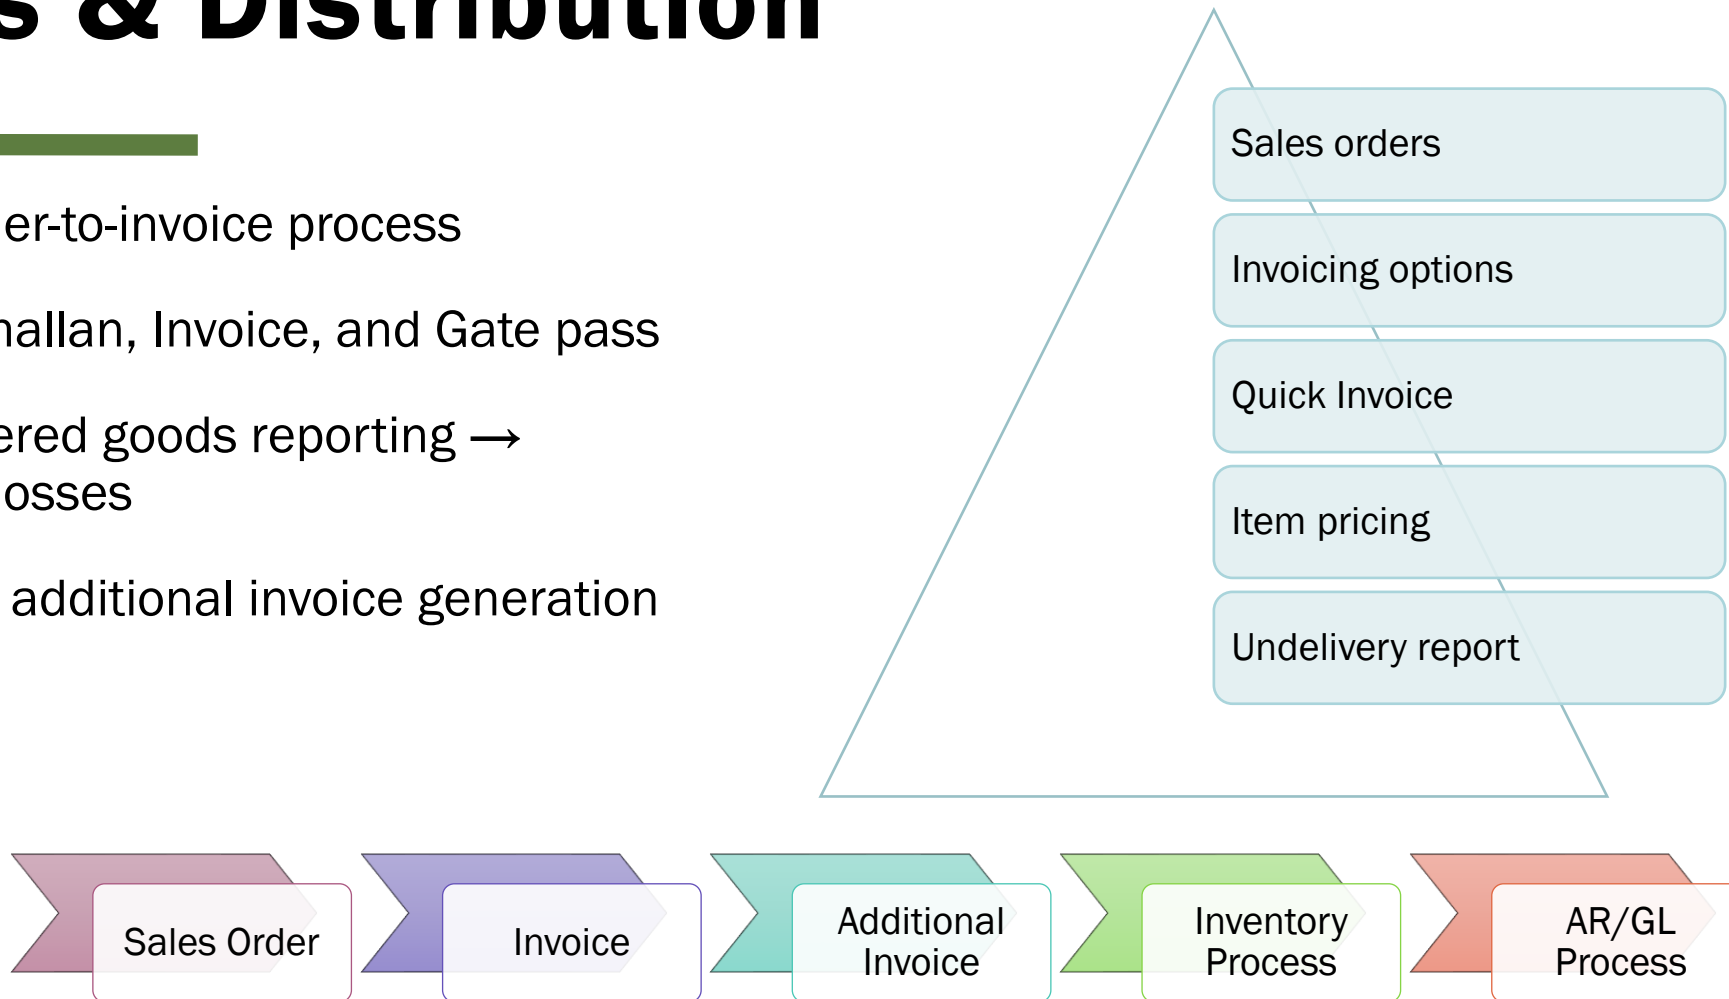

- ❑ Streamline supplier management with automated purchase processes
- ❑ Partial/Full GRN and pending items
- ❑ GRN and return tracking ensure accurate stock updates
- ❑ Procurement efficiency reduces costs and improves control

Core Modules

Sales & Distribution

- ❑ Fast order-to-invoice process
- ❑ Track Challan, Invoice, and Gate pass
- ❑ Undelivered goods reporting → reduce losses
- ❑ Quick & additional invoice generation

Core Modules

Inventory Management

Stock receive	Stock issue	Stock transfer
Item ledger	Item ageing	Movement frequency
Warehouse control	Depot management	Stock accuracy

- ❑ Real-time stock visibility across depots and plants
- ❑ Inventory ageing → reduce dead/slow-moving stock
- ❑ Item transfer, issue, and return tracking
- ❑ Item movement frequency → informed sourcing decisions

Core Modules

General Accounting

Chart of accounts	Vouchers	Posting & unposting
Year-end processing	Day book	Cash/Bank book
Trial balance	P&L statement	Balance sheet

- ❑ Integrated chart of accounts linked to sales, purchase & inventory
- ❑ Auto trial balance, P&L, and Balance Sheet
- ❑ Year-end processing simplified
- ❑ No duplicate entries → fewer errors

System Strengths

Reliability & Security

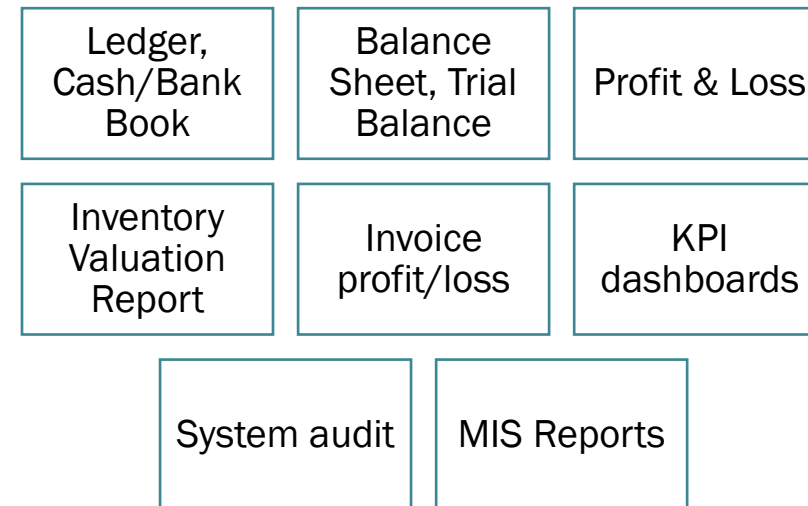

Java based	MSSQL reliable	High availability
Scalable system	Data backup	Disaster recovery
Multi-organization	User friendly	Server Monitoring

- ❑ Built on Java + MSSQL → scalable and reliable
- ❑ Device responsive → access anywhere
- ❑ Automated backups & high availability
- ❑ Multi-business and multi-organization control
- ❑ Role-based access & audit logs

Reporting & Insights

Management Reports & Analytics

- ☐ Daily, monthly, and yearly sales reports
- ☐ Invoice wise gross profit reports
- ☐ Pending and undelivered reports
- ☐ Inventory ageing and movement frequency
- ☐ MIS accounting reports

Case Study

Collection efficiency **↑ 20%**

Stock mismatch **↓ 30%**

Decision-making time reduced from **weeks → hours**

Closing / Call to Action

Let's Modernize Your Business

- ❑ One system → one truth → one control
- ❑ Consolidated view of sales, inventory, and finances
- ❑ Ready to implement with minimal disruption
- ❑ Proposal: Start with a pilot and scale across all businesses

One system	Unified view	Real-time reports
Faster decisions	Reduce leakage	Improve collection
Scale easily	Proven success	Let's begin

Implementation & Support

Smooth Deployment & Ongoing Assistance

- ❑ Start with one company or department, scale gradually
- ❑ Data migration and legacy system integration
- ❑ Hands-on training for staff
- ❑ Local support team for troubleshooting and updates

Pilot start	Gradual rollout	Data migration
Training	Manuals	Local support
Remote support	Customization	Smooth transition
